What Can I Expect from my Online Course?

On Your Course Site

You will find the information and directions for completing the course requirements, such as:

+ A paragraph or two introducing your professor and the course requirements
+ A course syllabus listing the important assignments, deadlines, and grading policies
+ A listing of the required textbooks and a list of resources available through the Internet

Assignments

Your assignments may include short papers, internet searches, case studies, quizzes, etc.

+ You will check to see if the instructor has given any additional instructions or comments to your class. Usually this is done via e-mail.

Participation/Discussion

Class participation is very important. There are two ways class discussions are held:

+ Discussion Boards. Many times your instructor will present a discussion question and ask each student comment on a “discussion board” by a certain date. Your comment can be entered at any time day or night. Then, you check for a responses other students or your instructor have made to which you may want to respond.

Remote Proctoring of Exams

Remote Proctor Now is a video monitoring service that functions while you are taking Midterm and Final exams in the MSN program. You will need to have a webcam attached or built into the computer you will be taking your tests on. The fee is $15 per exam. This can be paid by credit/debit card or Paypal on the secured payment screen that will appear.

Online Expectations

Three (3) hours class time and at least three (3) hours per credit hour for reading assignments.
Computer Requirements

Hardware

+ Minimum Requirements — 64 MB RAM, Internet Connection.
