What Can I Expect from my Online Course?

On-Campus Orientation
You will attend an orientation your first semester to:
  + Meet with faculty and students
  + Receive a password and username to access the course website
  + Learn to navigate the Blackboard course system

On Your Course Site
You will find the information and directions for completing the course requirements, such as:
  + A paragraph or two introducing your professor and the course requirements
  + A course syllabus listing the important assignments, deadlines, and grading policies
  + A listing of the required textbooks and a list of resources available through the Internet

Assignments
Your assignments may include short papers, Internet searches, case studies, quizzes, etc. Also, there is usually a research paper required.
  + You will check to see if the instructor has given any additional instructions or comments to your class. Usually this is done via e-mail.

Participation/Discussion
Class participation is very important. There are two ways class discussions are held:
  + Discussion Boards. Many times your instructor will present a discussion question and ask each student comment on a “discussion board” by a certain date. Your comment can be entered at any time day or night. Then, you check for a responses other students or your instructor have made to which you may want to respond.
  + Chats. Very rarely, your instructors will schedule a certain time for all students to participate in a discussion simultaneously. This kind of discussion mirrors a typical in-person discussion since students comment and respond to each other immediately.
**Computer Requirements**

**Hardware**
- Minimum Requirements — 64 MB RAM, CD-ROM with sound, Internet Connection.
- Recommended Requirements — 128 MB RAM, DSL or Cable modem.

**Software**
- Internet Explorer 6.0 or Foxfire, Microsoft Office 97 or higher, Microsoft PowerPoint, Adobe Acrobat Reader, Current antivirus software.
